

Living City: Cycles of Change

Based on the exhibition *Living in the City* presented at Photoville 2017 by The NYC Municipal Archives at the Department of Records and Information Services

Given archival photos and cameras, students will analyze patterns of change in their neighborhoods, between 1988 to 2018, by documenting current areas and predicting what will change in the next 30 years.

Students will be able to:

- Analyze, compare and contrast historic photos and records
- Research and document buildings that represent the neighborhood today
- Identify patterns of change and make informed predictions about how the neighborhood will look in 30 years.

Part 1: Intro

1. Show a historic photo to your students. A selection of photos are available in the *Living in the City* Image Bank.
2. Examine the photo together using Visual Thinking Strategies.
 - Take a silent moment to look at the photo.
 - What's going on in this picture?
 - What do you see that makes you say that?
 - What more can we find?
3. Through this examination, try to identify the time and place this photo was taken.
4. Ask your students to reference outside knowledge, or historical references.

Authors: Educators Lothar Troeller, Meghan Clark, and Chela Crinnion with curators Michael Lorenzini and Dante Matero

Featuring photography by Larry Racioppo/NYC-HPD and various photographers from the NYC Municipal Archives

Grade Level: 9th - 10th grade

Subjects: Multidisciplinary

Time Required: 1-2 weeks

Materials Needed:

- [Living in the City Image Bank](#)
- Visual Thinking Strategies
- NYC Municipal Archives photos
 - Brooklyn
 - Manhattan
 - Bronx
 - Queens
 - Staten Island
- Cameras
- Color Printer
- Transparency or Tracing paper

Standards Addressed:

CCSS.ELA-LITERACY.RH.9-10.3
CCSS.ELA-LITERACY.RH.9-10.9

Living City: Cycles of Change

Based on the exhibition *Living in the City* presented at Photoville 2017 by The NYC Municipal Archives at the Department of Records and Information Services

Part 2: Activity

1. Look at the NYC Municipal Archives 1980s tax photos of your borough (digital links above). Provide the information, in the early 1980s, the Department of Finance determined that the 1940 photographs were too outdated for property tax appraisal purposes. So from 1982 to 1988, they photographed every property in the five boroughs.
 2. Have your students to research this archive and identify one location they recognize.
 3. Assign your students to take a current photo of that location today.
 4. Have your students compare and contrast the 1980s archival photo with their own current photo. Prompt your students with a few of the following questions:
 - What looks the same at this location?
 - What has changed about this location?
 - How was this location used in the 1980s?
 - How is this location used now?
 - What are the pros and cons of the changes that occurred?
 - What conclusions can you draw about why the changes occurred?
 5. Ask your students to share their findings with a small group. Have each group share themes and similarities that emerged in their discussion.
 6. Based on their observations of change from the past 30 years, ask your students to predict how their location will change in the next 30 years.
 7. Print out one copy of each student's photograph. Provide them a sheet of transparency paper or tracing paper. Overlay this sheet on their photograph, and ask them to sketch their predictions on it.
-

Part 2: Reflection

1. Create a space for students to present their predictions. Here are a few ideas:
 - Ask students to present their predictions to the class as if their peers are the city council or local community board. How do they think this location will look and feel in 30 years? What evidence, trends or forces of change lead them to this conclusion? Do they think this change makes a positive or negative impact in their community? If positive, how so? If negative, what can be done to change the outcome?
 - Set up an exhibition of this work around your classroom and conduct a neighborhood walking tour. Ask each student to be the docent of their location by explaining the history, current state, and future of it.
